2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Royal Craig on 12/15/2008.
3. The application has been amended as follows:

 - (b) As to claims 13 and 14, line 2, delete "analyzer" and replace it with --analysis unit--.
 - (c) As to claims 15 and 16, last line, delete "analyzer" and replace it with --analysis unit--.
 - (d) As to claim 17, line 6, delete "hemoglobin in" and replace it with --hemoglobin concentration in--.

Reasons for Allowance

4. Claims 1-20 are allowed.
5. The following is an examiner's statement of reasons for allowance:
 - (a) As to claims 1-10 and 18-20, the prior art does not expressly disclose or provide motivation to combine a system for determining hematocrit or hemoglobin concentration of blood with an analyzer for receiving a sampling device for collecting blood, with at least one ultrasonic transducer oriented toward an aperture in the sampling device for emitting an ultrasonic signal into the blood sample while still inside the sampling device.
 - (b) As to claims 11-16, the prior art does not expressly disclose or provide motivation to combine an apparatus for determining hematocrit or hemoglobin concentration of blood by ultrasonic analysis that includes a sampling device for acquiring a blood sample having a finger-grip at one end and an opposing functional end that includes a collecting region for collecting by capillary action, and a testing region and a pumping region.
 - (c) As to claim 17, the prior art does not expressly disclose or provide motivation to combine a blood analysis device for ultrasonically analyzing blood including a disposable blood sampling device that collects a sample by capillary action, and a means for transferring the blood to a testing cell by pressure differential.

(d) The closest prior art reference, Brimhall et al. (US Patent 4,854,170 henceforth "Brimhall") discloses an "apparatus and method for using ultrasound to determine hematocrit" including a sampling device/capillary tube (12) for collecting a blood sample (20), an analyzer, a signal/frequency generator (16) for generating an electronic signal, at least one ultrasound transducer (14) coupled to the generator (16) for converting the electronic signal to an ultrasonic signal, a receiver and a processor (figures 1-3; column 3, line 37 - column 4, line 36).

However, Brimhall does not disclose or provide motivation to combine with the prior art, the above-mentioned respective limitations in claims 1-20, respectively.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
